

Fortune Teller

Interactive Project

Alexis Guardado | DES 427

Design Brief

For this interactive concept, it will shape the user's future by offering them a personalized fortune. The user will engage with a crystal ball. By clicking the mouse, the user will receive a fortune from the universe. Each mouse click prompts the psychic to deliver a unique fortune from a pool of 5-10 possibilities that I will create. This ensures the user receives a fresh fortune with each click interaction, enhancing their experience.

Persona

User Profile

Name – Lucy White

Gender– Female

Age– 24

About the user

Lucy likes to say that she is a spiritual individual. She is usually spending most of her free time reading about Astrology and going to psychics. She is a very superstitious person and believes in supernatural abilities. She enjoys tarot because she is a very indecisive person and it gives her a path to follow.

Design Pain Points

Due to personal life and time constraints, Lucy does not always have the time to visit her local psychic. Lucy seeks an interactive device that can provide her with quick insights into the near future. Lucy values the reassurance and guidance it offers, as she can't make decisions on her own.
